**PC
TUNE-
UP**

Do any of these problems or concerns sound familiar with your Desktop or Laptop?

- PC takes forever to start up or shut down?
- PC seems generally slow?
- PC crashes unexpectedly?
- Internet has slowed down?
- Popup windows everywhere?
- Is your Windows Operating System current?
- Do you have the latest updates and security patches?
- Fears of Viruses, Spyware, Malware, Adware, Crippleware?
- Fears of the personal information on your Computer being exposed through the Internet?

A PC Tune-up consists of:

- Hardware performance evaluation and recommendations
- Operating System updates and patches
- Security updates and patches
- Device Driver updates
- Removal of Spyware, Adware, Malware and Viruses
- Optimization of Start-up Tasks to reduce boot time
- Repair of Registry errors to improve performance and stability
- Hard Drive optimization to free up space
- Hard Drive defragmentation to restore optimum performance
- Evaluation and recommendations regarding current Anti-virus solutions

Bring Your Slow Computer Back To Life

Have It Updated & Overhauled

Like homes or cars, computers need to be tuned up annually to maintain peak performance. Bring your computer back to life and stop it from running slow, freezing, and crashing by removing the items that compromise its health. A Tune-up restores performance, eliminates clutter, removes spyware, and updates Windows so everything runs problem free.

Do your PC a favor, and call today to book your PC Tune-up!
